The regular course of instruction in this school is similar to that of the best institutions of the country. Clinical instructions will be given daily at the Charity Hospital in the various branches of medicine. The professors being the attending surgeons and physicians to this extensive institution during the session of the school, have every opportunity of making their lectures practical and thorough.

The Professor of Obstetrics having unner his entire control the female wards of the hospital, is enabled to exhibit to the class those diseases peculiar to the sex, and also to furnish the senior frembers as many cases of labor as are necessary to give them a practical acquaintance with this important branch.

The facilities for prosecuting the study of practical anatomy and operative surgery are unrivalled—subjects being supplied in any number, free of charge.

OREGON AND CHINESE WHEAT.—Just received a few sacks of the above new and superior seed grain, from H. R. Smeltzer, esq., of Bloomfield farm. The Oregon is a red kernel wheat, and the Chinese a beautiful plump white kernel. These extraordinary varieties produced Mr. S. last season 45 to 50 unshels of wheat per acre, weighing 63 to 68 lbs. per bushel.

"Onegon AND China wheat.—There have been left at our office two new species of wheat.—one called 'Oregon,' the other 'China.' It was taken from the Bloomfield estate, belonging to Henry R. Smeltzer, near Middletown, Frederick county, Maryland. The 'Oregon' wheat was found or discovered by a missionary travelling through that territory, who breught it to this country in 1839. Mr. Smeltzer this year raised from four and a quarter acres, 212 bushels and 43 lbs., which is a fraction over 50 bushels to the acre. This wheat is very hardy, of a beautiful red color, with smooth chaff, heads from 5 to 6 inches long, and average from 90 to 130 grains to the head. It is believed it will yield at least 20 per cent. more to the acre than the ordinary wheat, from the fact that it has from 15 to 20 grains more to the head. The history of the China wheat is rather singular. A few heads were found in a box of China-ware imported from the north of China; and the heads being so very large and compact, the discoverer was induced to plant them. Mr. S. informs us that last year 47 bushels per acre. This is a beautiful white wheat, and has heads or ears about as long as the 'Oregon' wheat, and about the same number of grains to the head. The 'China' wheat is of the early kind, and, so far, has not been injured by smut, mildew, or fly."—Sus.

The faculty are gratified in being able to inform the community, that, in addition to the laboratory already attached to the college, arrangements have been made for opening a dental infirmary, which will go into operation the ensuing assision, and be conducted on the most liberal principles.

It is designed to extend relief, gratuitously, to all those who are too poor to pay a dentist, by simply defraying the cost of the material used in repairing the teeth.

All operations on the mouth and face will also be performed without charge.

This infirmary, it will be perceived, is a purely charitable institution, extending the same relief to the dental apparatus of all the dest tute poor, that medical infirmaries do to diseases of other parts of the body.

medical infirmaries do to diseases of other parts of the body.

It will also add greatly to the practical facilities which the college already furnishes the student, by a giving him not only a better opportunity of daily witnessing the various operations, but also of taking part himself, and thus acquiring that practical tact so essential to the skillful dentist.

MISS LOUISA A. P. MOORE.

MISS MOORE'S school for young ladies is now open for the reception of pupils. She has determined, on account of the present pressure of monetary affairs, to accommodate her terms to the situation and circumstances of all parents and guardians. The situation for the establishment of the academy is deemed to be one of the most eligible in the city of Washington for health, excellent water, salubrious sir, and a respectable neighborhood. The basement story is spacious, and will be prepared with every accommodation for the comfort and improvement of the pupils.

From the experience which Miss Moore has had for four years past in the education of young ladies, and the superior advantages she has enjoyed in the "Gettyaburg Fernale Academy," she is not without hope that she will be prepared to give satisfaction to those parents who may confide their daughters to their instruction and care.

BUTLER COAL.—The subscriber has on hand one thousand tons of that superior article so well known in this District, suitable for grates or stoves; and would call the attention of the public to supply themselves as soon as possible; freights are advancing, and there is quite an advantage in getting their coal in dry weather. I would particularly call the attention of persons using radiators, as I have an article that is broken expressly for that kind of stoves. There will be a certificate of weight sent with each load.

Orders received at the coal office, on Pennsylvania avenue, opposite Coleman's Hotel; or at the yard, corner of Maryland avenue and 13th street, near the Long Bridge.

The following is from the Rev S, S. Schmucker, D. D.,
President Theol. Seminary, Gettypburg, Pa.

The undersigned having heard that Miss Moore
is about to open a female seminary in Washington
city, takes great pleasure in teatifying to her entire
competency for such an enterprise. Miss Moore
was for geveral years engaged as teacher in the female seminary of this place, during which time the
undersigned attended the examinations, and also
had several pupils under her charge, and he can confidently attest her excellence as a teacher. By the
amiability of her disposition, and the gentleness of
her manners, she does not fail to gain the affection
and esteem of her pupils, and her success in communicating knowledge in a familiar way uniformly
commands their respect.

The moral character of Miss Moore is of the very
first order, and the subscriber shall be greatly gratified to hear the success of her present enterprise.

CALLED AND KNOWN AS NORTH BEND,
THE residence of the late James Minge, containing, by actual survey, five hundred and sixty acres, situated in one of the finest neighborhoods in Virginia, within a few hours' run of Norfolk, Richmond, and Petersburg, in a high state of improvement from the application of lime and marl, adjoining the lands of Ro. C. Harrison's estate, now advertised for sale by his executor, Tho. E. Poythress, eag., to be sold on the 15th day of October next. The union of these two estates would make one of the most desirable and valuable plantations on the lower James, and slords an opportunity for the investment of capital which will seldom occur. Both these plantations are healthy and pleasant residences, with every facility of living well, the river and creeks abounding with fish and fowl, and the forests with deer and wild turkeys. The soil adapted to tobacco, corn, and wheat—the latter more particularly; some of the land having produced the rise of forty bushels to the scre, by actual measurement. This land, if not sold before, will be put up to the highest bidder on the 15th of October, and sold without reserve, positively. There is a deed of trust on the land for \$5,000, for which the purchaser, I have no doubt, on paying punctually the interest, can get a reasonable time to pay the balance in twelve months, with interest. A new dwelling-house, with all other conveniences for the accommodation of a family, in good order.

Any further information will be attended to on application to Thos. S. Gholson, esq., of Petersburg, who has the entire management of his, I will cheerfully accede.
